

Customer:
MTCC # 22

System:
Domestic Hot Water
Boiler

Problem

Multiple pinhole leaks, just another problem that property managers do not want to deal with.

Solution

R&G Mechanical Services was contracted to complete a full pipe replacement. The plumbers ensured a successful project enforcing cleanliness and proper communication throughout the project.

How did we do?

R&G Mechanical replaced the riser pipes at 22 Shallmar Blvd, and the project was completed on time and on budget. They were very accommodating to our needs during the project, as there were many schedules to consider. R&G was very professional to ensure that the work areas were cleaned after they completed the work for the day. Many residents were very pleased with the way that the R&G staff had accommodated them, and they not feel that the work had inconvenienced them in anyway. We would recommend R&G to anyone as they are very organized, professional and dedicated to keeping their clients happy. Thank you R&G for your wonderful service!
