

Customer:
MTCC #962

System:
Domestic Hot Water
System

Problem

High rise building with constant pinhole leaks.

Solution

CPL restored all the domestic hot water risers running in many different directions through walls ceilings and floors. Some unit Owners had marble and granite back splashes that were never touched thanks to our pipe restoration technology.

How did we do?

“Although unforeseen circumstances came into effect, CPL managed to complete the project with little to no disruption to residents. I whole heartedly recommend Canada Pipe Lining for any mechanical project your building may be considering.”

Jamie Koralek Board of Director – MTCC #962
